

ENVIRONMENTAL POLICY

RSR is committed to minimising the environmental impact of its operations through the adoption of sustainable practices and continual improvement in environmental performance. We accept the Duty of Care imposed by legislation as the minimum standard to be set and maintained, and we aim to be a sustainable business that is financially viable, environmentally sustainable, and socially equitable.

These aims will be achieved through:

- Being conscious of the environment beyond our immediate operations and taking steps to prevent pollution and minimise environmental harm.
- Monitoring and complying with legislation, regulations, and codes of practice on environmental matters relevant to RSR operations.
- Monitor, review and continually improving our environmental performance by continually reassessing changing technology, business requirements, and best environmental practices
- Being proactive in minimising our production of waste by reusing or recycling materials and monitor for the 12 months.
- Monitor the consumption of fossil fuels and incorporating long-term strategies for energy efficiency into planning and development
- Communicate environmental related information to all employees
- Be neighbour environmentally friendly
- Make available to all interested parties on request
- Top level management to demonstrate leadership and commitment with respect to the environmental management system

Signed

A handwritten signature in black ink, appearing to read 'S Birt', is written over a light grey rectangular background.
